PBA 6: Pterional Approach to ICA

Trainee:	Assessor:	Date:	
Start time:	End time:	Duration:	
Operation more difficult than usual? Yes / No (If yes, state reason)			

PR2 Gives effective briefing to theatre team PR3 Ensures proper and safe positioning of the patient on the operating table PR4 Ensures proper and safe positioning of the patient's head PR5 Ensures proper and safe positioning of headpins in cases where Mayfield head clamp is being used PR6 Checks the positioning of all the body parts of the patient PR7 Demonstrates careful skin preparation PR8 Demonstrates careful draping of the patient's operative field PR9 Ensures supporting equipment and materials are deployed safely and appropriate drugs administered (e.g. catheter, diathermy) PR10 Ensures appropriate drugs administered (eg. antibiotics, mannitol)		Competencies and Definitions	Score N/U/S	Comments
Demonstrates awareness of sequelae of operative or non-operative management Demonstrates sound knowledge of complications of surgery Explains the perioperative process to the patient and/or relatives or carers and checks understanding Explains likely outcome and time to recovery and checks understanding II. Pro operative planning Demonstrates recognition of anatomical and pathological abnormalities (and relevant co-morbidities) and selects appropriate operative strategies/techniques to deal with these e.g. nutritional status Demonstrates ability to make reasoned choice of appropriate equipment, matals or devices (if any) taking into account appropriate investigations e.g. X-rays, USG, ICG, Stereotaxy PL3 Checks materials, equipment and device requirements with operating room staff (eg. aneurysm clips, retractors etc) PL4 Ensures the operative site is marked where applicable Checks patient records, personally reviews investigations (CT angiogram or DSA in particular) III. Pro operative preparation Checks in theatre that consent has been obtained PR3 Ensures proper and safe positioning of the patient on the operating table PR4 Ensures proper and safe positioning of the patient's head Ensures proper and safe positioning of headpins in cases where Mayfield head clamp is being used PR5 Checks the positioning of all the body parts of the patient PR7 Demonstrates careful draping of the patient's operative field Ensures supporting equipment and materials are deployed safely and appropriate drugs administered (e.g. catheter, diathermy) PR10 Ensures appropriate drugs administered (e.g. antibiotics, mannitol) Arranges for and deploys specialist supporting equipment (e.g. Image intensifier, IDM) effectively IV. Exposure and closure E1 Demonstrates knowledge of optimum skin incision / portal / access	l.	Consent		
C3 Demonstrates sound knowledge of complications of surgery	C1	Demonstrates sound knowledge of indications and contraindications		
Explains the perioperative process to the patient and/or relatives or carers and checks understanding Explains likely outcome and time to recovery and checks understanding I. Pre operative planning Demonstrates recognition of anatomical and pathological abnormalities (and relevant co-morbidities) and selects appropriate operative strategies/techniques to deal with these e.g. untritional status Demonstrates ability to make reasoned choice of appropriate equipment, materials or devices (if any) taking into account appropriate investigations e.g. X-rays, USG, ICG, Stereotaxy PL3 (Checks materials, equipment and device requirements with operating room staff (eg. aneurysm clips, retractors etc) PL4 Ensures the operative site is marked where applicable PL5 (checks patient records, personally reviews investigations (CT angiogram or DSA in particular) III. Pre operative preparation PR1 Checks in theatre that consent has been obtained PR2 Gives effective briefing to theatre team PR3 Ensures proper and safe positioning of the patient on the operating table PR4 Ensures proper and safe positioning of the patient's head PR5 Ensures proper and safe positioning of headpins in cases where Mayfield head clamp is being used PR6 Checks the positioning of all the body parts of the patient Demonstrates careful skin preparation Demonstrates careful draping of the patient's operative field PR9 Ensures supporting equipment and materials are deployed safely and appropriate drugs administered (e.g. catheter, diathermy) PR10 Ensures appropriate drugs administered (eg. antibiotics, mannitol) Arranges for and deploys specialist supporting equipment (e.g. Image intensifier, 10M) effectively IV. Exposure and closure E1 Demonstrates knowledge of optimum skin incision / portal / access	C2	Demonstrates awareness of sequelae of operative or non-operative management		
C4 checks understanding C5 Explains likely outcome and time to recovery and checks understanding II. Pre operative planning Demonstrates recognition of anatomical and pathological abnormalities (and relevant co-morbidities) and selects appropriate operative strategies/techniques to deal with these e.g. nutritional status. Demonstrates ability to make reasoned choice of appropriate equipment, materials or devices (if any) taking into account appropriate investigations e.g. X-rays, USG, ICG, Stereotaxy. PL3 Checks materials, equipment and device requirements with operating room staff (eg. aneurysm clips, retractors etc) PL4 Ensures the operative site is marked where applicable Checks patient records, personally reviews investigations (CT angiogram or DSA in particular) III. Pre operative preparation PR1 Checks in theatre that consent has been obtained PR2 Gives effective briefing to theatre team PR3 Ensures proper and safe positioning of the patient on the operating table PR4 Ensures proper and safe positioning of the patient's head Ensures proper and safe positioning of headpins in cases where Mayfield head clamp is being used PR6 Checks the positioning of all the body parts of the patient PR7 Demonstrates careful skin preparation PR8 Demonstrates careful draping of the patient's operative field Ensures supporting equipment and materials are deployed safely and appropriate drugs administered (e.g. catheter, diathermy) PR10 Ensures appropriate drugs administered (eg. antibiotics, mannitol) Arranges for and deploys specialist supporting equipment (e.g. Image intensifier, 10M) effectively IV. Exposure and closure E1 Demonstrates knowledge of optimum skin incision / portal / access	C3	Demonstrates sound knowledge of complications of surgery		
II. Pre operative planning PL1 person provides planning PL1 person provides planning PL1 person provides planning PL2 person provides planning person provides person	C4			
PL1 Demonstrates recognition of anatomical and pathological abnormalities (and relevant co-morbidities) and selects appropriate operative strategies/techniques to deal with these e.g. nutritional status PL2 Demonstrates ability to make reasoned choice of appropriate equipment, materials or devices (if any) taking into account appropriate investigations e.g. X-rays, USG, ICG, Stereotaxy PL3 Checks materials, equipment and device requirements with operating room staff (eg. aneurysm clips, retractors etc) PL4 Ensures the operative site is marked where applicable PL5 Checks patient records, personally reviews investigations (CT angiogram or DSA in particular) III. Pre operative preparation PR1 Checks in theatre that consent has been obtained PR2 Gives effective briefing to theatre team PR3 Ensures proper and safe positioning of the patient on the operating table PR4 Ensures proper and safe positioning of the patient's head PR5 Ensures proper and safe positioning of headpins in cases where Mayfield head clamp is being used PR6 Checks the positioning of all the body parts of the patient PR7 Demonstrates careful skin preparation PR8 Demonstrates careful draping of the patient's operative field PR8 Ensures supporting equipment and materials are deployed safely and appropriate drugs administered (e.g. catheter, diathermy) PR10 Ensures appropriate drugs administered (eg. antibiotics, mannitol) PR81 Arranges for and deploys specialist supporting equipment (e.g. Image intensifier, IOM) effectively IV. Exposure and closure E1 Demonstrates knowledge of optimum skin incision / portal / access	C5	Explains likely outcome and time to recovery and checks understanding		
PL1 relevant co-morbidities) and selects appropriate operative strategies/techniques to deal with these e.g. nutritional status Demonstrates ability to make reasoned choice of appropriate equipment, materials or devices (if any) taking into account appropriate investigations e.g. X-rays, USG, ICG, Stereotaxy PL3 (Checks materials, equipment and device requirements with operating room staff (eg. aneurysm clips, retractors etc) PL4 Ensures the operative site is marked where applicable Checks patient records, personally reviews investigations (CT angiogram or DSA in particular) III. Pre operative preparation Checks in theatre that consent has been obtained PR2 Gives effective briefing to theatre team PR3 Ensures proper and safe positioning of the patient on the operating table PR4 Ensures proper and safe positioning of the patient's head Ensures proper and safe positioning of headpins in cases where Mayfield head clamp is being used PR5 Checks the positioning of all the body parts of the patient PR7 Demonstrates careful draping of the patient's operative field PR8 Demonstrates careful draping of the patient's operative field Ensures supporting equipment and materials are deployed safely and appropriate drugs administered (e.g. catheter, diathermy) PR10 Ensures appropriate drugs administered (eg. antibiotics, mannitol) PR11 Arranges for and deploys specialist supporting equipment (e.g. Image intensifier, 10M) effectively IV. Exposure and closure En Demonstrates knowledge of optimum skin incision / portal / access	II.			
PL2 materials or devices (if any) taking into account appropriate investigations e.g. X-rays, USG, ICG, Stereotaxy PL3 (Checks materials, equipment and device requirements with operating room staff (eg. aneurysm clips, retractors etc) PL4 Ensures the operative site is marked where applicable Checks patient records, personally reviews investigations (CT angiogram or DSA in particular) III. Pre operative preparation PR1 Checks in theatre that consent has been obtained PR2 Gives effective briefing to theatre team PR3 Ensures proper and safe positioning of the patient on the operating table PR4 Ensures proper and safe positioning of the patient's head PR5 Ensures proper and safe positioning of headpins in cases where Mayfield head clamp is being used PR6 Checks the positioning of all the body parts of the patient PR7 Demonstrates careful skin preparation PR8 Demonstrates careful draping of the patient's operative field Ensures supporting equipment and materials are deployed safely and appropriate drugs administered (e.g. catheter, diathermy) PR10 Ensures appropriate drugs administered (eg. antibiotics, mannitol) Arranges for and deploys specialist supporting equipment (e.g. Image intensifier, IOM) effectively IV. Exposure and closure E1 Demonstrates knowledge of optimum skin incision / portal / access	PL1	relevant co-morbidities) and selects appropriate operative strategies/techniques to		
PL3 Checks materials, equipment and device requirements with operating room staff (eg. aneurysm clips, retractors etc) PL4 Ensures the operative site is marked where applicable Checks patient records, personally reviews investigations (CT angiogram or DSA in particular) III. Pre operative preparation PR1 Checks in theatre that consent has been obtained PR2 Gives effective briefing to theatre team PR3 Ensures proper and safe positioning of the patient on the operating table PR4 Ensures proper and safe positioning of headpins in cases where Mayfield head clamp is being used PR5 Checks the positioning of all the body parts of the patient PR7 Demonstrates careful skin preparation PR8 Demonstrates careful draping of the patient's operative field Ensures supporting equipment and materials are deployed safely and appropriate drugs administered (e.g. catheter, diathermy) PR10 Ensures appropriate drugs administered (eg. antibiotics, mannitol) PR11 Arranges for and deploys specialist supporting equipment (e.g. Image intensifier, IOM) effectively IV. Exposure and closure E1 Demonstrates knowledge of optimum skin incision / portal / access	PL2	materials or devices (if any) taking into account appropriate investigations e.g. X-		
Checks patient records, personally reviews investigations (CT angiogram or DSA in particular) III. Pre operative preparation PR1 Checks in theatre that consent has been obtained PR2 Gives effective briefing to theatre team PR3 Ensures proper and safe positioning of the patient on the operating table PR4 Ensures proper and safe positioning of the patient's head PR5 Ensures proper and safe positioning of headpins in cases where Mayfield head clamp is being used PR6 Checks the positioning of all the body parts of the patient PR7 Demonstrates careful skin preparation PR8 Demonstrates careful draping of the patient's operative field PR9 Ensures supporting equipment and materials are deployed safely and appropriate drugs administered (e.g. catheter, diathermy) PR10 Ensures appropriate drugs administered (eg. antibiotics, mannitol) Arranges for and deploys specialist supporting equipment (e.g. Image intensifier, IOM) effectively IV. Exposure and closure E1 Demonstrates knowledge of optimum skin incision / portal / access	PL3	Checks materials, equipment and device requirements with operating room staff		
in particular) Pre operative preparation Checks in theatre that consent has been obtained PR2 Gives effective briefing to theatre team PR3 Ensures proper and safe positioning of the patient on the operating table PR4 Ensures proper and safe positioning of the patient's head PR5 Ensures proper and safe positioning of headpins in cases where Mayfield head clamp is being used PR6 Checks the positioning of all the body parts of the patient PR7 Demonstrates careful skin preparation PR8 Demonstrates careful draping of the patient's operative field PR9 Ensures supporting equipment and materials are deployed safely and appropriate drugs administered (e.g. catheter, diathermy) PR10 Ensures appropriate drugs administered (eg. antibiotics, mannitol) Arranges for and deploys specialist supporting equipment (e.g. Image intensifier, IOM) effectively TV. Exposure and closure E1 Demonstrates knowledge of optimum skin incision / portal / access	PL4	Ensures the operative site is marked where applicable		
PR1 Checks in theatre that consent has been obtained PR2 Gives effective briefing to theatre team PR3 Ensures proper and safe positioning of the patient on the operating table PR4 Ensures proper and safe positioning of the patient's head PR5 Ensures proper and safe positioning of headpins in cases where Mayfield head clamp is being used PR6 Checks the positioning of all the body parts of the patient PR7 Demonstrates careful skin preparation PR8 Demonstrates careful draping of the patient's operative field PR9 Ensures supporting equipment and materials are deployed safely and appropriate drugs administered (e.g. catheter, diathermy) PR10 Ensures appropriate drugs administered (eg. antibiotics, mannitol) PR11 Arranges for and deploys specialist supporting equipment (e.g. Image intensifier, IOM) effectively IV. Exposure and closure E1 Demonstrates knowledge of optimum skin incision / portal / access	PL5			
PR2 Gives effective briefing to theatre team PR3 Ensures proper and safe positioning of the patient on the operating table PR4 Ensures proper and safe positioning of the patient's head PR5 Ensures proper and safe positioning of headpins in cases where Mayfield head clamp is being used PR6 Checks the positioning of all the body parts of the patient PR7 Demonstrates careful skin preparation PR8 Demonstrates careful draping of the patient's operative field PR9 Ensures supporting equipment and materials are deployed safely and appropriate drugs administered (e.g. catheter, diathermy) PR10 Ensures appropriate drugs administered (eg. antibiotics, mannitol) PR11 Arranges for and deploys specialist supporting equipment (e.g. Image intensifier, IOM) effectively IV. Exposure and closure E1 Demonstrates knowledge of optimum skin incision / portal / access	III.	Pre operative preparation		
PR3 Ensures proper and safe positioning of the patient on the operating table PR4 Ensures proper and safe positioning of the patient's head PR5 Ensures proper and safe positioning of headpins in cases where Mayfield head clamp is being used PR6 Checks the positioning of all the body parts of the patient PR7 Demonstrates careful skin preparation PR8 Demonstrates careful draping of the patient's operative field PR9 Ensures supporting equipment and materials are deployed safely and appropriate drugs administered (e.g. catheter, diathermy) PR10 Ensures appropriate drugs administered (eg. antibiotics, mannitol) PR11 Arranges for and deploys specialist supporting equipment (e.g. Image intensifier, IOM) effectively IV. Exposure and closure E1 Demonstrates knowledge of optimum skin incision / portal / access	PR1	Checks in theatre that consent has been obtained		
PR4 Ensures proper and safe positioning of the patient's head PR5 Ensures proper and safe positioning of headpins in cases where Mayfield head clamp is being used PR6 Checks the positioning of all the body parts of the patient PR7 Demonstrates careful skin preparation PR8 Demonstrates careful draping of the patient's operative field PR9 Ensures supporting equipment and materials are deployed safely and appropriate drugs administered (e.g. catheter, diathermy) PR10 Ensures appropriate drugs administered (eg. antibiotics, mannitol) PR11 Arranges for and deploys specialist supporting equipment (e.g. Image intensifier, IOM) effectively IV. Exposure and closure E1 Demonstrates knowledge of optimum skin incision / portal / access	PR2	Gives effective briefing to theatre team		
PR5 Ensures proper and safe positioning of headpins in cases where Mayfield head clamp is being used PR6 Checks the positioning of all the body parts of the patient PR7 Demonstrates careful skin preparation PR8 Demonstrates careful draping of the patient's operative field PR9 Ensures supporting equipment and materials are deployed safely and appropriate drugs administered (e.g. catheter, diathermy) PR10 Ensures appropriate drugs administered (eg. antibiotics, mannitol) PR11 Arranges for and deploys specialist supporting equipment (e.g. Image intensifier, IOM) effectively IV. Exposure and closure E1 Demonstrates knowledge of optimum skin incision / portal / access	PR3	Ensures proper and safe positioning of the patient on the operating table		
PR6 Checks the positioning of all the body parts of the patient PR7 Demonstrates careful skin preparation PR8 Demonstrates careful draping of the patient's operative field PR9 Ensures supporting equipment and materials are deployed safely and appropriate drugs administered (e.g. catheter, diathermy) PR10 Ensures appropriate drugs administered (eg. antibiotics, mannitol) PR11 Arranges for and deploys specialist supporting equipment (e.g. Image intensifier, IOM) effectively IV. Exposure and closure E1 Demonstrates knowledge of optimum skin incision / portal / access	PR4	Ensures proper and safe positioning of the patient's head		
PR7 Demonstrates careful skin preparation PR8 Demonstrates careful draping of the patient's operative field PR9 Ensures supporting equipment and materials are deployed safely and appropriate drugs administered (e.g. catheter, diathermy) PR10 Ensures appropriate drugs administered (eg. antibiotics, mannitol) PR11 Arranges for and deploys specialist supporting equipment (e.g. Image intensifier, IOM) effectively IV. Exposure and closure E1 Demonstrates knowledge of optimum skin incision / portal / access	PR5			
PR8 Demonstrates careful draping of the patient's operative field PR9 Ensures supporting equipment and materials are deployed safely and appropriate drugs administered (e.g. catheter, diathermy) PR10 Ensures appropriate drugs administered (eg. antibiotics, mannitol) PR11 Arranges for and deploys specialist supporting equipment (e.g. Image intensifier, IOM) effectively IV. Exposure and closure E1 Demonstrates knowledge of optimum skin incision / portal / access	PR6	Checks the positioning of all the body parts of the patient		
PR9 Ensures supporting equipment and materials are deployed safely and appropriate drugs administered (e.g. catheter, diathermy) PR10 Ensures appropriate drugs administered (eg. antibiotics, mannitol) PR11 Arranges for and deploys specialist supporting equipment (e.g. Image intensifier, IOM) effectively IV. Exposure and closure E1 Demonstrates knowledge of optimum skin incision / portal / access	PR7	Demonstrates careful skin preparation		
drugs administered (e.g. catheter, diathermy) PR10 Ensures appropriate drugs administered (eg. antibiotics, mannitol) PR11 Arranges for and deploys specialist supporting equipment (e.g. Image intensifier, IOM) effectively IV. Exposure and closure E1 Demonstrates knowledge of optimum skin incision / portal / access	PR8	Demonstrates careful draping of the patient's operative field		
PR11 Arranges for and deploys specialist supporting equipment (e.g. Image intensifier, IOM) effectively IV. Exposure and closure E1 Demonstrates knowledge of optimum skin incision / portal / access	PR9			
IOM) effectively IV. Exposure and closure E1 Demonstrates knowledge of optimum skin incision / portal / access	PR10	Ensures appropriate drugs administered (eg. antibiotics, mannitol)		
E1 Demonstrates knowledge of optimum skin incision / portal / access	PR11	IOM) effectively		
	IV.	Exposure and closure		
E2 Plans the appropriate craniotomy / burr hole(s)	E1	Demonstrates knowledge of optimum skin incision / portal / access		
	E2	Plans the appropriate craniotomy / burr hole(s)		

PBA 2: Pterional Approach to ICA

	Competencies and Definitions	Score N/U/S	Comments
E3	Achieves an adequate exposure through purposeful dissection. Identifies and protects all surrounding structures		
E4	Closes the dura sensibly and carefully		
E5	Completes a sound wound repair where appropriate		
E6	Protects the wound with dressings, splints and drains where appropriate		

Competencies and Definitions		Score N/U/S	Comments
V.	Intra Operative Technique		
IT1	Follows an agreed, logical sequence or protocol for the procedure		
IT2	Consistently handles tissue well with minimal damage		
IT3	Controls bleeding promptly by an appropriate method		
IT4	Demonstrates a sound technique of knots and sutures / staples		
IT5	Uses instruments appropriately and safely		
IT6	Proceeds at appropriate pace with economy of movement		
IT7	Anticipates and responds appropriately to variation e.g. anatomy		
IT8	Deals calmly and effectively with unexpected events/complications		
IT9	Uses assistant(s) to the best advantage at all times		
IT10	Communicates clearly and consistently with the scrub team		
IT11	Communicates clearly and consistently with the anesthetist		
IT12	Elevates scalp flap and protects the frontal branch of the facial nerve		
IT13	Drills key burr hole +/- other burr holes as appropriate and creates an adequate craniotomy		
IT14	Takes down sphenoid ridge as appropriate		
IT15	Hitches and opens dura mater in safe and efficient manner		
IT16	Splits the Sylvian fissure carefully with preservation of sylvian veins		
IT17	Appreciates and dissects the cisterns and recognizes the content (ICA, MCA, ACA, optic nerve, 3rd nerve)		
VI.	Post operative management		
PM1	Ensures the patient is transferred safely from the operating table to bed		
PM2	Constructs a clear operation note		
PM3	Records clear and appropriate post operative instructions		
PM4	Deals with specimens. Labels and orientates specimens appropriately		

N = Not observed or not appropriate

U = Unsatisfactory

S = Satisfactory

Global Summary (based on the observed/relevant parts of this procedure only)

		Tick as appropriate	Comments
Level 0	Insufficient evidence observed to support a		

PBA 2: Pterional Approach to ICA
judgment

Level 1

Unable to perform the entire procedure under supervision

Able to perform the procedure under supervision

Does not usually require supervision but may need help occasionally

Competent to perform the procedure unsupervised (can deal with complications)
